

## AOC AGRI

### **"If the Animal is sick, how could we not be sick?"**

I once heard a conversation where a person said to the other, "consuming cow meat from a cow that is diagnosed with Foot & Mouth disease, is safe for human consumption".

How could that statement be true?? NO WAYS! The art of practicing medicine also requires a lot of common-sense. Logically when an animal is sick, it simply means that the meat is sick (potent) too, the meat belongs to the animal, meaning if you consume the meat then you are bound to fall sick or have health issues. The sickness doesn't fall from the sky, right?? It comes from somewhere; in this case it comes from THE COW.

Which brings me to my next question: "What makes the cow sick??".

**Answer:** "What makes you sick??, the food, the medication, beverages, air-pollution??...so that's what makes a cow sick too"

Let me start with the medication (vaccine/steroids), a lot of steroids are used to treat bigger animals because there is an assumption that the bigger the animal is, the stronger the vaccine or steroid should be BUT logically, the stronger the steroid, the larger the impact (Complications), a lot of the vaccines and steroids that are produced for live-stock contain a very high content of acid, a high content of acid leads to disaster. Logically if you consume a high concentrate of acids, what happens? There becomes acid congestion which leads to acid-reflux (Heart burn, heart attack extreme cases, Cholesterol Imbalance, arthritis, gout), medically too much acid pollutes your insulin and believe it or not your insulin-levels need to be calm and balanced, well that's if you aim to live a long and healthy life like a normal person. The imbalance of insulin levels is catastrophic to your CD4 Count basically your immune system.

The same happens to your Cows, Goats, sheep, pigs, chickens, hamsters, dogs, Cats and Rhinos.

We are busy complaining about the potency of food, drinks and medication, forgetting that the same food and medicine for animals come from the same line of production. (Processed).

A few examples of chemicals being used in the Animal Vaccines, steroids, Medication and feed....: Beryllium (responsible for growth, adds tons of mass [water retention] mainly in joint areas and airways [Lungs]), lithium (more on the side of electrolytes) in simple terms electrolytes are like the electricity for the stem-cells. "Where there is loadshedding there is no operation"!

The aim of electrolytes is to put energy (current) in the life-span of the stem-cells, in a nutshell electrolytes are the electricity for the stem cells, "THE WELL-BEING OF A LIVING ORGANISM"- stem cell health....I can mention more like helium which is catastrophic for the bile, phosphorus which is brutal on the circulation in the immune system inclusive of the veins and other circulation tubes and airways (induces a sandy substance, disturbing circulation) e.g. remember the severe pink eye cases we recently had ?? The sandy feeling in your eyes ?? that's PHOSPHORUS! when it has come into contact with wet and lubricated surfaces (Living organisms e.g. veins, saliva, tonsils)

The chemicals used to make all the steroids, vaccines and food are called 'Metallic Chemicals'. A very dangerous aspect of metallic-chemicals is that they become solids when they come into contact with liquids (Blood, saliva etc.)...I'm basically explaining where the clogging and clotting of blood streams in animals and humans comes from...the infinity complications we are facing together-with animals.

Silicon, Argon, fluorine, chlorine etc....all these become potent to any living organism when entered in the immune system.... which brings me to my next statement, "WHY YOU SHOULD TRUST AOC for your ANIMALS AND CROPS"

The above summarization is just a little bit of information for farm owners and pet owners to understand as to why the sudden health-dysfunction in their live-stock.

The establishment of AOChem primarily stems from Ancient African Medicine & Methodologies, ancient people were very fertile meaning they had lots of kids and economically that raises the demand for things like food and medicine etc.

So they had to develop mechanisms that ensured livestock grew quicker and healthier as well as crops, ofcourse to meet demand.

The study of herb dosage and herb-partnership came to play.

AOC Multi-Nutritional Tea has herbs like Ilabatheka, its botanical name is African Potato. Did you know that the African Potato consists of all 13 vitamins( A,D,E,K),Vitamin B(B1 B2 B3 B5 B6 B7 B8 B9 B12), dose of electrolytes(Natural lithium), we use it as a base ingredient because it's able to welcome the other ingredients and ensure the concoction is tied together and balanced, meaning the herb is immaculate for CD4 count and PH Balance, has natural helium which is great for the animal Bile(NB!!!when dealing with herbs and medication, DO NOT ARGUE WITH THE BILE, become best-friends with the bile) , the bile can collapse your entire kraal.

Not only is the AOC tea a "medication" for Animals and crops but it is also an enhancer for quick growth, recovery and reproduction, in isiZulu it is called Umkhumiso.

Umkhumiso is a concoction of herbs that enhances livestock to: give birth to twins, recovery very quickly, perfect quality meat, perfect cuts, perfect meat contents, perfect milk....it was about GROWTH! GROWTH! GROWTH! (ROI), but 'health' narrated the mission. How did "Health" narrate the mission??

Answer: because they understood that if the animals & Crops were healthy then it was more like an automated response that HUMANS WILL ALSO BE HEALTHY, because logically where else would the bacteria be coming from!!?if everything we are putting in our mouths is Healthy and clean.

That was their conclusion which if you really think about it, the conclusion came from COMMON-SENSE.

Which basically means Umkhumiso was a natural healthy & safe steroid - everything has its dual-form (Good and bad) the good steroid came from natural herbs, the bad steroids come from Metallic-Chemicals. It's a GAME-CHANGER.... Living organisms are considered to be natural (humans, animals and plants etc.)

Let me draw something for you to think about: "when a 'HERB' is used to treat or enhance any living organism, the equation becomes: "NATURE + NATURE = NATURE.

and when 'Metallic-Chemicals' are used the equation becomes: NATURE + CHEMICAL = I don't know what but the answer seems like a chronic imbalance..... logically. (Catastrophic to be precise)

Sometimes we need not to complicate things, so we can get on with our lives and businesses without vaccine complications .....AOC Ladies and gentleman.... How may we help???

**NB!!! (Mixing herbs at home is not safe, Dosage needs to be considered. Only highly trained specialists are to do it)**

It's a GAME-CHANGER.... Living organisms are considered to be natural (humans, animals and plants etc.)

Let me draw something simple for you to think about: "when a 'HERB' is used to treat or enhance or maintain any living organism, the equation becomes: "NATURE + NATURE = NATURE.

and when 'Metallic-Chemicals' are used the equation becomes: NATURE + CHEMICAL = I don't know what but the answer seems like a chronic imbalance..... logically. (Catastrophic to be precise)

Sometimes we need not to complicate things, so we can get on with our lives and businesses without vaccine complications .....AOC Ladies and gentleman.... How may we help???

| Concentrated AOC Tea | Diluted Tea  | Price (Zar) |
|----------------------|--------------|-------------|
| 1 Liter              | 10 Liters    | R660        |
| 2 Liters             | 20 Liters    | R1,400      |
| 3 Liters             | 30 Liters    | R2000       |
| 4 Liters             | 40 Liters    | R2,660      |
| 5 Liters             | 50 Litters   | R3,400      |
| 10 Liters            | 100 Liters   | R6,660      |
| 25 Liter             | 250 Liters   | R 16,660    |
| 50 Liters            | 500 Liters   | R33,400     |
| 100 Liters           | 1000 Liters  | R66,660     |
| 200 Liters           | 2000 Liters  | R133,400    |
| 400 Liters           | 4000 Liters  | R266,800    |
| 800 Liters           | 8000 Liters  | R533,400    |
| 1000 Liters          | 10000 Liters | R666,800    |

**NB:** The above table is a summarization, proper solutions can be developed upon further engagements between AOChem (Dr S. Msomi) and client e.g. Payment plan and more detailed diagnostics.

Below is a Dosage Prescription using the example of COWS:

(The amount of diluted AOC tea an animal can have **a day**)

**Small size(cattle)** – 750ml per cattle

**Medium size** – 1 liter

**Large size** – 2 liters cow

Conclusion:

Agriculture plays a very vital role in the stability of the economy and also plays a vital role in the destabilization of the economy.

Therefore, it's imperative to ensure we are breeding healthy livestock and crops, at the same time being able to meet the Supply and demand and at AOC we simply use Herbs.

Umkhumiso.
